CONSTRUCTION

# SUPRIYA CONSTRUCTION

# ABOUT US

**SUPRIYA CONSTRUCTION** is a pioneer in the provision of value-added construction services in the residential, commercial, IT, hospitality, industrial, and healthcare sectors throughout India, forming successful partnerships with them throughout the construction process.

With projects in Maharashtra and other major metropolises like Mumbai and Pune, we are proud of our resources, which include solid infrastructure, cutting-edge equipment, and a professional and dedicated team.

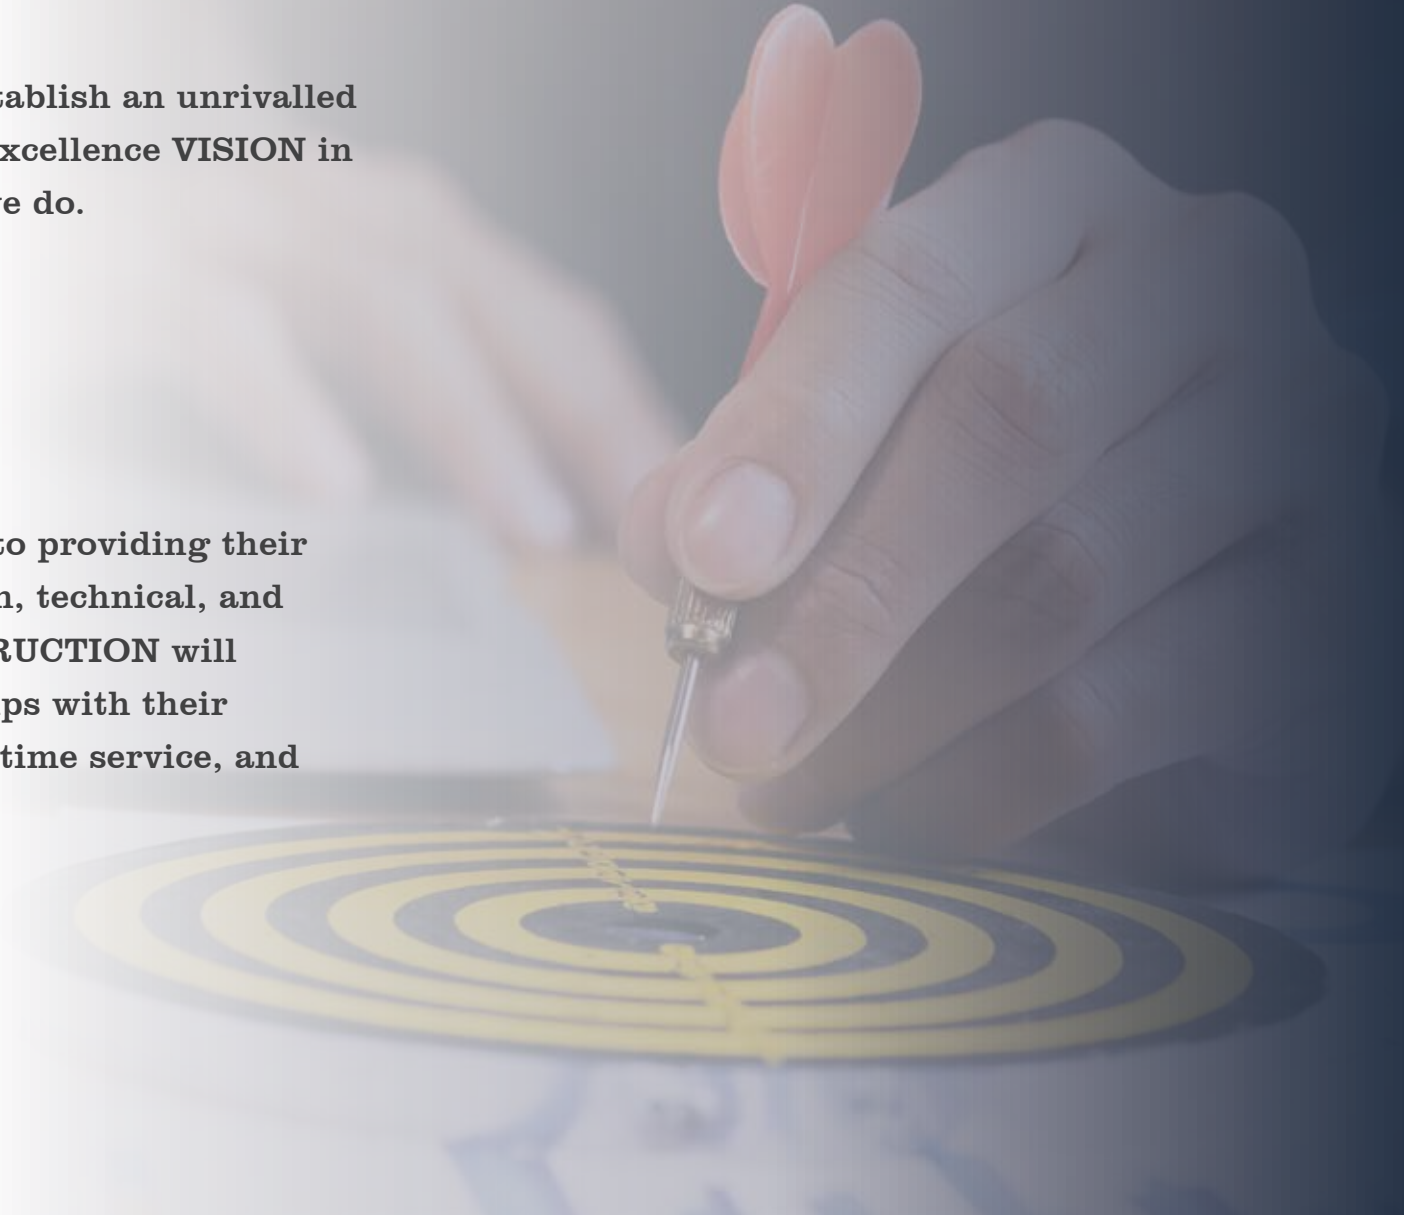

# VISION

**SUPRIYA CONSTRUCTION** aspires to establish an unrivalled reputation for consistently striving for excellence **VISION** in the pursuit of perfection in everything we do.

# MISSION

**SUPRIYA CONSTRUCTION** is dedicated to providing their customers with high-quality construction, technical, and management services. **SUPRIYA CONSTRUCTION** will work hard to build long-term relationships with their clients by focusing on safety, quality, on-time service, and anticipating their needs.

# HISTORY

**SUPRIYA CONSTRUCTION** was established in 2017 in Mumbai with the sole purpose of providing Construction Management Services and setting an example of excellence in the field.

**SUPRIYA CONSTRUCTION** is a subsidiary of M/s. S S CONSTRUCTION, which was founded in Mumbai in 1982 by Mr. Sudhakar Shingare. After finishing more than 75+ residential and commercial projects in Mumbai. Suppriya construction has 12+ Crore turnover.

Refining itself with every new square foot, the organization continues to strive to deliver its world class services.

# THE PRESENT DAY

---

SUPRIYA CONSTRUCTION provides professional client-focused construction solutions all across India. As an employee-owned company, we go above and beyond on every project and deliver on our promises with integrity. We are a 100% employee-owned company whose daily actions are guided by our core values.

SUPRIYA CONSTRUCTION's success over the years can be attributed to its employees' commitment to high-quality work, outstanding customer service, and a safety programme that has resulted in millions of zero-accident hours.

Since day one, SUPRIYA CONSTRUCTION's workforce has been empowered by honesty and open communication, and it shows in our work.

## **MARBLE DOOR AND WINDOW FRAME FIXING WORK**

**Stone applications:** Introducing our marble window sills and door frames that serves as accent pieces in every space not only are they functional, sturdy support structures to your window and doors but they also add to the detail and décor of a space Available in both standard and custom sizes, these items come ready-to-fit for you! Their convenience, value-for-money function and exclusive design is already a trend among the top designers and architects of the country. these window sills and door frames are pre-polished to 100% accuracy and absolutely ready to use. It's time to pay attention to the parts you never thought could uplift the visual décor of your space. Window and door frame moulding also done by us with skilled labour.

## **KOTA FLOORING**

**Kota Stone is a naturally available, fine-grained variety of limestone originated from Kota, Rajasthan. Its alluring natural look, durability and low cost makes it the most extensively used material in both the interiors and exteriors of houses and commercial areas.**

**Usually the flooring used in Passage and Lobby Areas.**

**We are doing kota flooring on tread and riser as well, with polishing. and groove making / champering also done by us on tread and riser of the building.**

## **VITRIFIED AND CERAMIC FLOOR/ WALL TILE FIXING WORK**

---

Ceramic tiles are one of the most used materials for floors as well as walls. These tiles can be used extensively in kitchens, bathrooms, bedrooms and even living rooms or commercial spaces. Their popularity is attributable to the characteristics of ceramic - durable, adaptable, various colours and textures and different finishes.

Depending on the finish you like, there are multiple types of ceramic tiles. They are easy to clean and low maintenance, making them an all-time favourite for everyone who favours convenience. (wall tiles / Dado tiles are fix onto bath, w/c , and kitchen areas)

## **WATERPROOFING**

---

It is the process of making an object or structure waterproof or water-resistant so that it remains relatively unaffected by water or resisting the ingress of water under specified conditions. Such items may be used in wet environments or underwater to specified depths. Water-resistant and waterproof often refer to resistance to penetration of water in its liquid state and possibly under pressure, whereas damp proof refers to resistance to humidity or dampness.

Waterproofing is used in building structures (such as basements, decks, or wet areas).

## **KITCHEN PLATFORM/ COUNTER TOP FIXING WORK**

The common fitted Western-style kitchen is typically an arrangement of assembled unit cabinetry covered with a more-or-less continuous countertop work surface. The "unfitted" kitchen may also include detached and/or varied countertop surfaces mounted on discrete base support structures. Primary considerations of material choice and conformation are durability, functionality, hygienics, appearance, and cost.

When installed in a kitchen on standard wall-mounted base unit cabinets, countertops from front to back and are designed with a slight overhang on the front (leading) edge. This allows for a convenient reach to objects at the back of the countertop while protecting the base cabinet faces. Kitchen countertops may also be

installed on dining areas or bars, desk and table tops, specialized task areas; as before, they may incorporate cantilevers, freespans and overhangs depending on application. The horizontal surface and vertical edges of the countertop can be decorated in manners ranging from plain to very elaborate. They are often conformed to accommodate the installation of sinks, stoves (cookers), ranges, and cooktops, or other accessories such as dispensers, integrated drain boards, and cutting boards.
